

The Global e-Invoicing Network

Improve your Cash Flow with OB10 e-Invoicing

What is OB10

In order to improve the efficiency with which we process your invoices, the BBC is adopting electronic invoice receipt. Consequently, the BBC, in conjunction with Steria (the BBC's provider of outsourced financial transaction processing services) has joined the OB10 e-Invoicing network.

Using the OB10 network enables us to receive your invoices directly into our Accounts Payable (AP) systems and process them without the delays and inefficiencies associated with paper based invoicing. The good news is that the file format your invoicing system outputs today will be accepted by OB10. You don't need to install any hardware or software or change the way your systems are configured.

OB10 is a non-intrusive service that accepts your invoices and delivers them to the BBC the format required by their AP system.

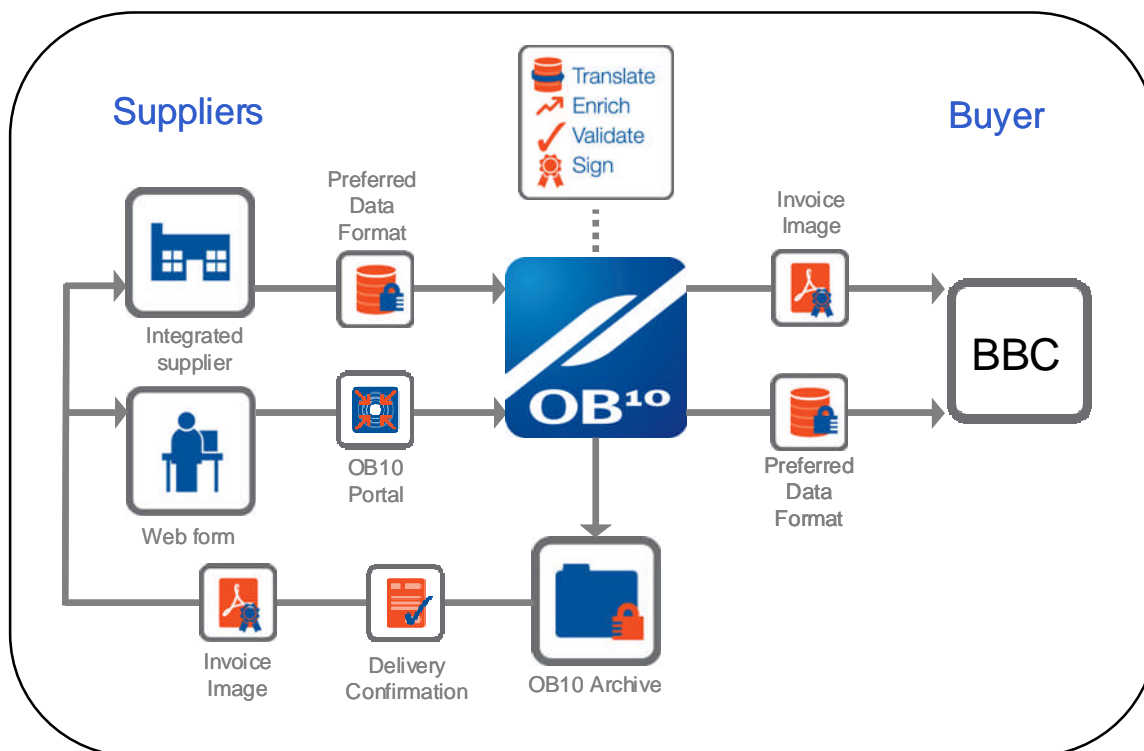

Network benefits

- Secure and guaranteed invoice delivery, no more invoices getting lost in the post
- It will take the BBC less time to process your invoices and therefore you are more likely to be paid on time
- No more delays due to missing information, landing on the wrong desk or manual intervention
- **ANY-TO-ANY DATA FORMATTING** Technology - there is no need for additional software or hardware
- Higher processing transparency and better Cash Flow Management due to 24/7 access and reporting
- VAT compliant, regardless of where invoices are sent from or received
- Easy and cost efficient to send invoices - at any time
- One-off account set-up. Once you have an account on OB10 you can send electronic invoices to all of your customers on the network.
- Secure data archiving, removing the need for you to physically store paper, and making VAT audits easier to facilitate.

The Global e-Invoicing Network

One Network – Many Customers

Accounts Receivable

Suppliers submit electronic invoices to OB10 directly from their billing system using the format, content and structure of their choice. Alternatively, suppliers can use an OB10 online Web Form to enter and transmit invoices. All suppliers need to use OB10 is Internet Access.

OB10

OB10 validates that each invoice contains the information required by the BBC and that it complies with the applicable tax authorities. Our validation rules mean reduced exceptions at the buyer end. Electronic images are stored in a secure online data warehouse.

BBC

OB10 transmits electronic invoices to the BBC financial system using their preferred format, content and structure – enabling automated, straight through processing. OB10 also transmits a digital image of each invoice, with line level detail. This means a reduction in paper handling and thereby a reduction in invoicing costs.

The future of invoicing

The OB10 network boasts a customer base of some of the biggest buyers (and their suppliers) across Europe, the US and Asia Pacific - and the number is increasing daily. With increasing numbers of companies requesting electronic invoices as a way to improve their supplier payments process, OB10 offers you the most simple and cost effective way to issue electronic invoices.
