You can find out more about the AHRC/BBC Knowledge Exchange Programme on our blog: [http://www.bbc.co.uk/blogs/knowledgeexchange](http://www.bbc.co.uk/blogs/knowledgeexchange). We also have an online knowledge network for media professionals and academics called beebac.

beebac is a network for BBC staff, academics and industry partners where you can find people, exchange ideas and find out about projects and resources. If you work in the media you’ll gain access to academics researching in the field of media and communications who may have research to offer you. If you’re an academic you will be able to access data for your research projects and media professionals who are interested in your research findings. beebac is a pilot project and is currently in beta testing. Please join the network at [http://beebac.welcomebackstage.com](http://beebac.welcomebackstage.com)
Speakers:

Sally Doganis

Sally Doganis is an award winning documentary programme maker with a long career in BBC, ITV and independent production. She specialised in high quality films on political, social and business subjects, and has won every major tv industry award for factual programmes. After 16 years with the BBC, on Panorama, Newsnight, the Money Programme and documentary series she joined the independent sector and became Controller of Factual Programmes for CarltonTV. She has used her knowledge of the media to teach at the London Business School, advise charities and to influence government policy. Her Panorama on child sexual abuse brought about a change in the law. She co-authored a book on child abuse with Baroness Jay and has written four childrens books. Her film on Margaret Thatcher’s election policy became required viewing in the subsequent US presidential campaign. She was appointed Fellow of the Royal Television Society for ‘outstanding work in the industry’ and is a key member of their events committee which organises debates and conferences on technical, editorial and business developments in the wider media. For many years she worked voluntarily as a manager in her local Mental Health Trust. She is currently a trustee of Rainer, a £20m turnover charity which supports young people in need. She is on the committee of Friends of Kenwood House, Hampstead. A keen ballet enthusiast she was a member of the Central Ballet School’s fundraising committee and is a supporter of the ENB ballet school. She is an advisor to several companies on their media strategy.

Matthew Postgate

Matthew Postgate has been the Controller BBC Research & Development since October 2008. Matthew is responsible for shaping and leading all research and innovation activities to ensure the corporation continues to deliver value to the BBC, wider industry and academia. As part of his long terms strategy for the division he is focused on aiding the rest of the corporation in its remit to deliver a Digital Broadband Britain.

Prior to this role Matthew Postgate was the BBC’s Controller of Mobile a position he occupied from May 2007. He had specific responsibility for coordinating the corporation's public service presence across all mobile platforms. During his time as Controller of Mobile he successfully led the relaunch of BBC Mobile and delivery of BBC iPlayer to the iPhone, iPod Touch and the Nokia N96.

Before joining the BBC in 2003 as an executive producer, Matthew worked as an emerging channel strategist with many blue chip organisations through digital consultancy Rufus Leonard including the Royal Mail Group, Shell, QinetiQ and BT.

He has also held positions as a telecoms consult and as the director of an internet infrastructure company.
Panel:

Bill Thompson

New media pioneer Bill Thompson has been working in, on and around the Internet since 1984.

Formerly head of new media at Guardian newspapers, where he established the paper's first website in 1994, he writes a weekly column, the BillBoard, for BBC News online, a monthly feature for new internet users for BBC Webwise. He makes occasional contributions to other publications both on and off-line and appears weekly on 'Digital Planet' on the BBC World Service and occasionally on other BBC radio and television programmes. Bill is a Visiting Fellow of the Journalism department at City University, a trustee of the Cambridge Film Trust and a member of the board of the New Writing Partnership. You can find him online at http://www.andfinally.com/ or working in one of Cambridge's many cafés.

David Bott

David was appointed as Director of Innovation Platforms in the Technology Strategy Board in July 2007. He was then made Director of Innovation Programmes in July 2008.

David graduated from the University of Sussex with a BSc in Polymer Science. He stayed on to do a PhD sponsored by ICI Plastics, spending the summers working in their laboratories at Welwyn Garden City. As a result of this experience, he joined the British Petroleum Research Centre at Sunbury-on-Thames where he led a team working on electrically conductive polymers, polymer batteries and non-linear optics.

8 years later he joined Courtaulds to set up and run their Strategic Research Group. In addition he spent separate years responsible for Carbon Fibre Research (1989) and Performance Films (1992) (in America). After another 8 years he left to join ICI Acrylics as Research Director. He then joined National Starch, where he was responsible for research in their Specialty Synthetic Resins Division for 2 years and then became a Director of Group Technology for ICI.

Throughout this time, he has sat on the UK Government’s Technology Foresight Panel for Materials, was President of the Industrial Affairs Division of the Royal Society of Chemistry (2002–2004) and the Co-Chairman of the Strategy and Implementation Board of the Crystal Faraday Partnership on Green Chemistry (2001 – 2007). He is Chairman of Oxford Biomaterials and a Director of Apaclara and Spineless Design. He is also an advisor to FirstVentures, a Venture Capital Fund focusing on advanced materials and nanotechnology. From 2006 until 2008 he was part time CEO of Materials UK, an organisation set up to implement and develop the work of the Materials Innovation and Growth team.
David Good

David Good is a psychologist at the University of Cambridge, is a Fellow of King's College, and until 2008 he was Education Director of the Cambridge-MIT Institute. In 2000 he founded the Crucible network in Cambridge with Alan Blackwell to foster projects linking work in the Arts Humanities and Social Sciences to research and design in Technology. He is a member of the governing bodies of the University of Cambridge and the Royal College of Art.

Lisa Mooney Smith

Lisa Mooney Smith is Associate Dean of Arts at the University of Northampton; developing Northampton's research and enterprise portfolio as well as working with the Arts and Humanities Research Council on its Knowledge Transfer Strategy Group and Knowledge and Evaluation Committee. She was previously based at the University of Nottingham's Humanities and Social Sciences Research Centre, where she acted as adviser to the dean of the arts and humanities faculty. While at Nottingham Lisa devised and managed the Research Exchange Network (REN); a targeted and specific network for the arts and humanities research community embarking upon, or interested in the exchange of research knowledge.

Clare Reddington

Responsible for the strategic development and delivery of iShed, Clare works with industry, academic and creative partners to deliver collaborative research around digital technology and the creative industries.

iShed projects include Media Sandbox, a scheme to support SMEs to research new ideas in pervasive media, Light Up Bristol and the Creative Technology Network. Clare also ran SE3D with HP Labs and Diffraction Artist in Industry Placements. Before joining Watershed in 2004, Clare organised the Cheltenham Festival of Science, an annual five day festival exploring, promoting and encouraging debate around contemporary scientific development.

Dr Adrian Woolard

Dr Adrian Woolard is the Head of Innovation Culture, BBC Research & Development. His team provides a central support resource for a wide range of BBC divisions, to make it easier and more effective to undertake collaborative innovation work. The team also has responsibility for supporting internal processes for the transfer of ideas, prototypes and knowledge into production and encouraging best practice across the BBC’s FM&T division. Projects delivered include the BBC AHRC
Knowledge Exchange Programme, BBC Backstage, Innovation Labs and the Mashed event.

Adrian's current research focuses on exploring the changing relationships between content, audience and technology in an emerging multi-genre, multi platform & multi channel environment. Augmented reality, pervasive computing, participatory media and the potential value of play to create new forms of education and entertainment have all featured in the recent collaborative R&D project, Participate.

His research background lies in the areas of animatronics, working with Jim Henson's Creature Shop, and virtual characters. Prior to joining the BBC, he led technical development for BT's Avatar project at Millennium Dome, London. He has worked as an application specialist in motion capture for visual effects and games industries at Vicon and as a software developer at Argonaut Games.
